

Dear Sir,

I would like to strongly protest The Broadband over Power Line system as proposed. I have been involved in Amateur Radio since 1954, and would like to continue to pursue it as my primary hobby. The Broadband over Power Lines as proposed would cause interference across the entire ham HF spectrum which would render it totally useless.

I would like to suggest that you visit the ARRL web site at <http://www.arrl.org/news/stories/2003/08/08/2/?nc=1> There you will find links to studies on BPL and also results from the ARRL sending a roving ham into a neighbor hood where this technology was being tested. The results of this test including video is available there. I want to thank you for providing this opportunity ffor comment and your consideration and help in this matter would be greatly appreciated. Thank you.

Sincerely,
William G. Hull
